

57. A composition as recited in claim 56, wherein the phosphor paste further comprises a thickening agent and an organic solvent.

58. A composition as recited in claim 57, wherein the thickening agent is selected from the group consisting of cellulose and acrylic resin thickening agents.

59. A composition as recited in claim 57, wherein the organic solvent is selected from the group consisting of alcohol and ester solvents.

#### REMARKS

This Preliminary Amendment is submitted to pursue claims protecting a method of forming a phosphor layer(s) in discharge cell defined in a cavity utilizing a phosphor paste deposited within the cavity, to a discharge cell having a phosphor layer within a cavity thereof and to a composition of a paste for forming a phosphor layer in a cavity of a discharge cell, all as set forth with particularity, variously, in corresponding ones of the foregoing new claims 28-59. No new matter is presented.

It is respectfully requested that this Preliminary Amendment be entered in the above-referenced application.

Application No.  
Group Art Unit

Docket No. 522.1919-C4/HJS
